### **Field Trip & Transportation Safety Restraint Policy**

Academy Child Development Center, Inc always maintains a high standard for safety when transporting children. When riding in class M vehicles such as our white activity bus, young children need to use an approved safety restraint system. Consequently, Academy has purchased approved 5-point harness seats for children up to 90 pounds. Parents may occasionally transport children for field trips. These parent volunteers will be required to submit a copy of their current driver's license prior to the field trip. Before any child may be transported by a private passenger vehicle, their parent must give permission and supply an approved safety restraint for their child's use in the parent volunteer's passenger vehicle.
